

Vargate Telemetry — Independent Audit + Insight Layer for Claude

Pulled from Anthropic's management APIs · hash-chained · with analytics, alerts, and insights on top

PULL ARCHITECTURE

scheduled pull · customer admin credentials · zero infra changes

Production traffic between employees and Claude is unchanged — no proxy, no interception, no performance impact.

CAPABILITY LAYER — WHAT VARGATE DOES WITH THE DATA

ANALYTICS

Behavioral analytics

See through tokens to actual work

- AI-leverage score (0–100) per user
- Paste-vs-author ratio
- Workflow repetition patterns
- Output adoption signals

→ identify power users vs. auto-pilots

INSIGHT

Workforce automation

Department roll-up of leverage data

- SCIM/HR system integration
- Department x task heatmap
- Automation-candidate ranking
- Bridge to Vargate Pro deployment

→ where to deploy agents next

COMPLIANCE

Policy alerts (detect)

Read-only flagging of violations

- PII — SSN, PCI, PHI patterns
- Workplace conduct violations
- High-severity risk patterns
- Routes to SIEM, Slack, email

→ catch violations before auditors do

ANOMALY

Spend & behavior anomalies

Statistical baselines per entity

- Token-spend spikes (3σ)
- Off-hours usage
- Power-user drop-offs
- Model-migration events
- Subject switch (insider risk)

→ catch rogue agents, runaway costs & insider risk

Detect-only by design. For prevent-and-block on autonomous agents, see Vargate Pro (the proxy product).
